## Education

### Applied Computer Science (unfinished) Transition Program + Master

2021 - 2023

KU Leuven, Leuven

### Applied Computer Science (AI & Robotics) Professional Bachelor

2018 - 2021

University College PXL, Hasselt

## Experience

### Internship

PXL Smart ICT, Hasselt

During a full-time internship of 14 weeks, I developed a platform where Artificial Intelligence can compete in board games. Users can upload their own AI to participate for a place in the leaderboard. We used technologies such as Java Spring Boot, React and Docker.

2021

### OBS VR

College PXL, Hasselt  
KU Leuven, Leuven

As part of the honors program, I took a deep dive in Virtual Reality and Unity. This project was in cooperation with the KU Leuven. Future teachers were unable to complete their viewing internship during the Corona-pandemic; for this reason, I developed a solution in VR.

2020

### IT Instructor

Topvakantie, Koksijde

Every summer, I teach Java and/or Game Development at summer camps with participants from age 12 to 18. After 25 hours of lessons, they can create their own game.

2018 - Now

## Projects / Events

[github.com/jorisguffens](https://github.com/jorisguffens)

### Cybersecurity Challenge

The Cybersecurity Challenge Belgium is a tournament for students, organized by cybersecurity-focused companies. Various challenges include: reverse engineering, cryptography, exploit, web hacking... I've participated three times in total with a top place of 11th out of ± 200 teams.

2021 - 2023

### Humor Hazard

[humorhazard.com](https://humorhazard.com)

HumorHazard is an online multiplayer version of the R-rated card game Joking Hazard. The game can be played in the browser and is made with Java and React.

2018 - 2020

### Minecraft Mods

[guflimc.com](https://guflimc.com)

I've been interested in game development for a long time. By developing server mods for Minecraft in Java, I extend the game with new functionality. My mods have over 35 000 downloads combined.

2015 - Now

## Skills

HTML/CSS, JavaScript (Node), PHP
